PROFESSIONAL SUMMARY

Web developer with a foundation in Python, Django and Flask and hands-on experience building websites and business landing pages. Now focusing on React and the JavaScript full-stack path. Created an AI-assisted, local-first restaurant POS project and bring business awareness from a Commerce degree and collaboration with marketing teams.

SELECTED PROJECTS

D4NGER-POS | **AI-assisted personal software project**

- Built a local-first restaurant point-of-sale system covering order handling, checkout, held orders, cashier access, shifts, reports, refunds/voids and receipt workflows.
- Worked with a React/Next.js frontend, TypeScript/Express API and SQLite data layer with AI support; gained exposure to transactional checkout, idempotency and receipt-printing reliability.

D4NGER Diploma | **Programming course website** | **Website**

Created a course website organizing a lecture library, practice assignments and a learning roadmap.

Zamzam Tourism | **Travel-business landing page** | **Website** | **GitHub**

Developed an Arabic-language landing page presenting travel services and direct WhatsApp inquiry paths.

Abdullah Fekry Portfolio | **Earlier front-end project** | **Website** | **GitHub**

Built a personal portfolio website during the early stage of my web-development journey.

TECHNICAL BACKGROUND

Web development: Python, Django, Flask, JavaScript, HTML, CSS, Bootstrap, Tailwind CSS

Currently learning: React.js | Next.js and Node.js are next learning priorities

Additional exposure: PHP, WordPress, Java, Dart

ADDITIONAL TRAINING & EXPERIENCE

UP-Marketing Agency | **Marketing & creative-team training**

Supported image, video and audio production tasks while learning about campaign workflows, marketing strategy and content calendars. Tools: Photoshop, Canva, Filmora X, CapCut, Adobe Premiere, FL Studio and RX9.

Student Activities | **Marketing fundamentals & team collaboration**
